### Quick settings

#### Power key

1 When the terminal is powered off, hold down the power key for 3 seconds to switch the terminal on.

2 When the terminal is powered on, briefly press the power key to lock the screen.

#### User-defined key

1 The user-defined key will be set as "Home Key" by default.  
2 To reset the user-defined key: go to "Quick Setting" > "Key Map", then set the parameters per your needs.

#### Touch the screen

1 Back to previous page: swipe inward from the left or right edge of the screen.  
2 Back to the desktop: swipe the screen from bottom to top.  
3 Switch to new task: swipe the screen from bottom to top, then hold on until the recently used apps display.

4104 AV Culemborg  
The Netherlands

7

- 1 Do not charge the device in a hot or humid environment. The temperature will affect the charging efficiency.
- 2 The terminal contains a built-in battery. Please do not try to replace it yourself in order to avoid damage.
- 3 Do not use the terminal's wireless functionalities where wireless device use is prohibited or where it may cause interference or danger, such as in mines or gas stations.
- 4 Use only a dry, soft cloth to clean the terminal. Cleaning with a wet cloth or other chemical cleaners may deform and shorten the service life of the keypad and shell of the terminal.
- 5 The temperature should not be too low or high during use. This could cause malfunction. Please use the terminal under the permitted temperature.
- 6 If the terminal is damaged due to a drop or water, contact the service center. Do not try to repair it yourself.
