

MATRIX 220™

The Matrix 220 imager is the most compact image based bar code reader for top performance with the highest flexibility. It is the ideal imager reader for Electronics, Automotive, Packaging and Document Handling applications.

The Matrix 220 imager is designed for superior performance thanks to a 1.2 MPixel high resolution sensor and a new multicore image processing platform.

The Premium platform is designed for superior performance, thanks to a new quad-core image processing platform that can double the processing power and halve the decoding time compared to the standard version. The main customer benefits of this increased computing power translate into increased throughput, and efficiency, as well as faster handling during multi-recipe mode. The Matrix 220 Premium can capture and process twice as many images as the standard version in a given time period.

The innovative lighting solutions with an integrated flexible illumination system makes the Matrix 220 imager perfect for reading bar codes marked with DPM (Direct Part Marking). The Matrix 220 offers in a single model the polarized and diffused light options resulting in optimal illumination on any type of surface. The white and red lights models are capable of solving a huge variety of applications with the best performance. The electronic focus control allows easy remote job changing during assembly line reconfiguration with extreme reading flexibility.

The Matrix 220 imager has the best ease of use because of the green and red spot lights, the X-Press™ button, the intuitive HMI and the DL.CODE™ configuration software, which has been improved with the Automatic Setup mode for a quick and easy code reading.

ESD and Anti-YAG protection are available as front cover accessories to enhance the product flexibility reducing the number of models and simplifying the stock management.

The IP67 and IP65 industrial grade rating and the operating temperature range from -10 to 50 °C / 14 to 122 °F guarantee the best quality and robustness in the Manufacturing Industry applications. The Matrix 220 imager offers cost-effective communication options with Power over Ethernet (PoE) connectivity, onboard PROFINET/IO and ETHERNET/IP industrial fieldbus.

With its outstanding performance, the Matrix 220 imager delivers a high performance/price ratio offer in the Datalogic portfolio.

HIGHLIGHTS

- Ultra-compact dimensions and rotating connector for easy integration and installation in tight spaces
- Industrial grade electronic focus for extreme reading flexibility
- New All-In-One DPM illuminator; Red and blue-light polarizing filter and diffused illuminator on one model for many application needs and strong DPM reading performances
- Ultraviolet illumination system perfectly suitable for all the industrial applications characterized by UV-sensitive fluorescent ink
- Top performing High Power Illuminator models for challenging high speed applications
- New multicore image processing platform excellent for high speed applications and capable of reading up to 2 mils code resolution
- Hardware Acceleration to speed up algorithms and improve decoding capabilities
- Digimarc Barcode reading technology for added value decoding applications
- High Dynamic Range to improve image quality and contrast
- Power over Ethernet option, onboard PROFINET/IO and ETHERNET/IP for industrial connectivity
- OPC UA protocol for Industry 4.0
- Extreme industrial grade IP65 and IP67 ratings for harsh environments; -10 to 50 °C / 14 to 122 °F operating temperature, new flexible cables suitable for robotic arms applications
- ESD and Anti-YAG protection as front cover accessory for extreme flexibility and optimized stock

APPLICATIONS

Electronics:

- Track and trace PCB board manufacturing
- Electronic components (e.g. chip)
- Electronic products tracking
- DPM barcode reading (on plastic, glass, metal)

Automotive:

- DPM code validation after marking
- Work-in-progress control
- Parts and assemblies traceability

Packaging:

- Primary packaging barcode reading
- Package traceability
- Food & Beverage

Document Handling:

- High speed applications
